Overview of the Thai Stock Market April 1, 2020 – March 31, 2021

April 2020 to March 2021: The SET rose from the year's low in mid-Mar as investors panicked in response to the pandemic of the new coronavirus tagged COVID-19, leading to a sell-off in worldwide investment assets. The sell-off was attributed to investor expectations that economic activities would decrease dramatically after the government enforced coronavirus restrictions such as temporary closure of businesses, cancellation of international flights and transport etc. The national lockdown relieved the local infection rates and brightened the investment condition so the market rebounded in April 2020 and rose until mid- June 2020. The government and Bank of Thailand launched urgent measures to aid businesses and individuals damaged by COVID-19. However, no abatement of the spread of COVID-19 outside the country, as seen in rapid increases in number of daily new cases, pressured the market mood after mid- June 2020. Intensifying political rallies, especially after attempts of dissolution in October 2020 and worse earnings for 2Q20 (dropped both YoY and QoQ) led investors to decide to downsize portfolios. The market pattern changed in November 2020, switching from downward to upward on a flow of good news. The US presidential election was won by Joe Biden, leading capital to flow into emerging markets as investors expect Biden's foreign policy to be more compromising and cooperative than Trump's, which freshened international trade and investment. Progress in COVID-19 vaccine trials also supported as tests of two drug makers showed their vaccines were more than 90% effective. The momentum continued in December 2020 as investors felt more hopeful on rapid economic recovery after the Food and Drug Administration in many countries approved emergency use of the coronavirus vaccine and began vaccinations. A rise of over 100% in DELTA gave a big push to the market in December 2020. The SET contracted in January 2021 on panic over a second wave of COVID-19 in the country. Increase in daily new cases led the government to impose controls via zoning based on the number and degree of new cases. Support by foreign factors (Biden's US\$1.9tn COVID-19 relief bill, rise in global commodity prices, etc.) and efficient control over COVID-19 by the government helped the market to keep moving upward in February 2021. In March 2021, the SET rose further, supported by upward earnings revisions for 2021 after many companies reported better-than-expected earnings in 4Q20. The SET closed March 2021 at 1,587.21.

SET return between April 2020 to March 2021 was +40.98%. The largest positive returns were in ETRON at +444.24%, AGRI at +178.52% and FIN at +103.26%. The largest negative returns were in PF&REIT -1.94% and ICT -0.32%. Foreign investors were net sellers of 179 billion baht.
