To Unitholders

### Market Summary

Global economy slows down as Covid-19 pandemic remains and economic activities are still below normal level. Nonetheless, central banks and governments still maintained stimulus packages to combat such impacts which could support global economy. Capital markets recovered after good results of vaccine development. Expectation of economic recovery led to a rise in bond yields although policy rates are likely to maintain at low level. Easing monetary policy in major countries will reduce headwind for risk assets.
