Message from the Company

To Unitholders

Market Summary

Global economy slows down as Covid-19 pandemic remains and economic activities are still below normal level. Nonetheless, central banks and governments still maintained stimulus packages to combat such impacts which could support global economy. Capital markets recovered after good results of vaccine development. Expectation of economic recovery led to a rise in bond yields although policy rates are likely to maintain at low level. Easing monetary policy in major countries will reduce headwind for risk assets.

Fund's Investment Strategy

Mainly invest in units of JPMorgan Funds – Asia Pacific Income Fund A (mth) - USD Class (Master Fund), which is set up and managed by JPMorgan Asset Management (Europe) S.à.r.l. The objective of Master Fund is to provide income and long term capital growth by investing primarily in income generating securities of countries in the Asia Pacific region (excluding Japan).

PERFORMANCE DISCLOSURES

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

Prior to 14/06/12 the benchmark was 50% Morgan Stanley Capital International All Country Pacific Index (Total Return Net) / 50% J.P. Morgan Asia Credit Index (Total Return Gross).

See the material risks, general disclosures and definitions on pages 2 & 3.

------------------	-----------------	---------------

Outcomes to the Shareholder *Potential impact of the risks above*

Loss	Volatility	Failure to meet the Sub-Fund's objective.
Shareholders could lose some or all of their money.	Shares of the Sub-Fund will fluctuate in value.	

GENERAL DISCLOSURES

Before investing, obtain and review the current prospectus, Key Investor Information Document (KIID) and any applicable local offering document. These documents, as well as the annual and semi-annual reports and the articles of incorporation, are available free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at www.jpmm.lu.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. No warranty of accuracy is given and no liability in respect of any error or omission is accepted.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory

obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmm.com/emea-privacy-policy. For additional information on the sub-fund's target market please refer to the Prospectus.

Effective 14 June 2012, JF Pacific Balanced Fund was restructured into JF Asia Pacific Income Fund. Key changes include investment objectives, investment universe, benchmark, distribution yield. Performance prior to 14 June 2012 was achieved under circumstances that no longer apply. Please refer to the offering document for details.

Please note, the investment manager may choose to hedge some or all of the fund's currency exposure.

Non rated includes non rated straight bonds, convertibles and equities.

Unrated onshore Chinese bond issues may be deemed investment grade to the

extent that their issuers hold an international investment grade rating by at least one independent international rating agency.

The yield displayed is in the base currency of the Sub-Fund. Actual share class yields may differ from the displayed yield due to currency effects.

DEFINITIONS

Overall Morningstar Rating™ assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

Correlation measures the relationship between the movement of the fund and its benchmark. A correlation of 1.00 indicates that the fund perfectly matched its benchmark.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta a measure of a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant.

Annualised volatility (%) an absolute measure of volatility and measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

Sharpe ratio measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio (IR) measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
