Message from the Company

To Unitholders

Market Summary

In the third quarter of 2020, global stock market is in recovery mode from Covid crisis and had a higher volatility before US election. In November, Joe Biden from Democrat party won an election and became US president with expectation of larger stimulus, higher taxes and reduction in trade war. On the other hand, Vaccine developments had a higher success rate in prevention of virus, vaccines began rollout gradually in late of fourth quarter 2020 as a result cyclical stock started to outperform in anticipation of re-open economy, while US treasury rate increased rapidly from 0.9% into 1.7% within 3 months, causing fixed income to underperform other asset classes. Policy makers' easing stance, starting from gigantic stimulus from Biden government to Fed monetary policy easing, are the major reasons that global stock price continued its uptrend.
