Message from the Company

To Unitholders

Market Summary

High inflation rate was a major concern in late of 2022. The problem stemmed from supply disruption, wage rising and expensive energy price. Central banks had to shift monetary policy stance aggressively. As a result, global economy slowed down due to continuous rate hike by FED and other major central banks. When look thoroughly, the sluggish was shown only in manufacturing sector, but not in service part which is the Fed's target. Hence the central bank has to keep hiking rate to fight with sticky inflation. The situation became intense when US regional banks faced with deposit flight and bank run in the first half of 2023. Fortunately, US regulator swiftly provided solution by guaranteeing total amount of deposit and finding new shareholders. After the situation was remedied, global equities could strongly increase from small group of US mega cap stock, while the rest could only rebound briefly, especially China's rally which quickly faded after sluggish in property sector outweighed reopening hopes. Global stocks faced with market correction again in the third quarter after long term US bond yield spiked sharply from resilient US economic growth, and pressured global stock valuation. However, at the FOMC meeting in November, Fed chairman's speech is interpreted by investors as a sign of a policy pivot, the risk of an additional hike has diminished significantly which led to a falling bond yield and equity market relief.

Fund's Investment Strategy

The fund mainly invests in units of AXA World Funds US High Yield Bonds USD Funds managed by AXA Funds Management SA (Luxembourg) at the average of not less than 80% of the net asset value of the fund. The investment objective of the Master Fund is to generate attractive total returns by investing in the full maturity and quality spectrum of sub-investment grade debt of US companies with improving fundamentals.
