Message from the Company

To Unitholders

Market Summary

In the second half of 2024, global equities could continue their uptrend but with increasing volatility. The combination of softening economic data such as job creation and manufacturing sectors, and high level of policy rates caused concern to investors. However, Fed adjusted policy rate aggressively with 0.50% rate cut to 5.00% in September 2024, as a result equity market was supported. Global stock met with high volatility again in late October as investors foresee US election result as uncertain. The candidates for US president were Kamala Harris from Democrat party which would make policies the same and Donald Trump from Republican Party which had economic stimulus and protectionist trade policies. In the end, Donald Trump won US presidency and US equity rallied strongly, while non-US stock prices underperformed from the concern of trade war.
