Message from the Company

To Unitholders

Overview of the Thai Stock Market December 1, 2024 – May 31, 2025

December 2024 to May 2025: In December the index fell heavily in the third week of the month, following international stock market trends in response to the Fed signaling a slowdown in policy rate cuts for 2025. The index closed at 1,400.21 points at the end of December. In January the index continued to decline, due to negative factors from all sides, including the Global Minimum Tax (GMT), concerns among Chinese tourists about safety related to human trafficking, and stock selling due to concerns about weak 4Q2024 performance. In February the index continued to decline, pressured by external factors such as US import tariffs on Canada, Mexico, and China, and 4Q2024 earnings of listed companies that were below expectations. In March the index continued its decline for the 5th consecutive month amid growing concerns over intensifying trade wars. The US proceeded to impose import tariffs on trading partners and implemented retaliatory measures, particularly against China. However, there were some positive factors from China's Two Sessions meeting which announced economic stimulus measures and the launch of ThaiESGX measures. Towards the end of the month, an earthquake that reached Thailand created panic and the stock market closed trading in the afternoon session. In April the index continued to decline as the US and China engaging in fierce tariff retaliation, threatening to impose rates in triple digits, but both sides later showed signs of easing tensions, allowing the market to turn positive for the first time in 6 months. Domestically, the situation was further hit after WorldBank cut GDP forecast down to 1.6% - the lowest in the region and Moody's downgrading credit rating outlook from Stable to Negative Baa1, despite 1Q25 earnings results better than market expectations. In May the index continued to decline from capital outflows following MSCI's reduction of Thai stock weightings, the Fed maintaining interest rates at 4.25 - 4.50% and warning of stagflation conditions, profit-taking after the announcement of 1Q25 operating results, and low IPO volume for the ThaiESGX funds that launched this month. Despite some positive developments early in the month after the US and UK reached a trade agreement as the first countries to do so, while China continued to roll out economic stimulus measures, and 1Q25 operating results that came out well.

Summary of the Thai stock market between December 2024 and May 2025: The SET index declined -19.5%. The industrial sectors that declined the most were Professional Services (-48.3%), Transports (-38.0%), Commerce (-32.2%), Electronic Components (-30.8%) and Property Developments (-30.8%), while the only sector that increased was Banking (+1.2%). Foreign investors were net sellers of 81.2 billion Baht, while institutional investors were net buyers of 3.6 billion Baht.
