Fund Type / AIMC Category

- Equity Fund
- Feeder Fund / SRI Fund / Fund with Foreign Investment related Risks
- Global Equity

Investment Policy and Strategy

- The Fund will mainly invest in Robeco Global Stars Equities IL USD (Master Fund). The master fund is managed by Robeco Institutional Asset Management B.V. The master fund aims to create good returns in the long term and promote ESG investments by taking ESG factors into consideration in the investment process. The Master fund has a substantially lower environmental footprint than the reference index. Investment strategy (As announced SRI Fund) Screening / ESG Integration.
- The master fund invests at least two-thirds of its NAV in equities of companies worldwide, primarily operating in developed countries. The fund applies fundamental analysis to select equities with strong cash flow and a high Return on Invested Capital (ROIC), focusing on companies that demonstrate a suitable approach to sustainable development.
- The Fund may consider investing in derivatives for purposes of enhancing the efficiency of portfolio management.
- The fund aims to achieve performance close to the Master Fund while the Master Fund aims to outperform the benchmark. (active management)

2. The fund's name and abbreviation have been changed from United Equity Sustainable Global Fund (UESG-M) to United Global Stars Equity Fund (UGSTAR-M), effective from June 23, 2025 onwards.

Definition

Maximum Drawdown : The percentage of the fund's maximum loss in the past 5 years (or since the fund's inception if it is launched for less than 5 years) which is measured from the highest NAV per unit to the lowest NAV per unit during such period. Maximum Drawdown is an indicator of the risk of loss from investing in the fund.

Recovering Period : The length of time that the fund takes in recovering from the point of maximum loss to earning back the initial investment.

FX Hedging : The percentage of foreign currency investment with FX hedging.

Portfolio Turnover Ratio : The frequency of securities trading in the fund portfolio over a certain period, calculated by taking the lower value between the sum of the value of securities purchased and the sum of the value of securities sold of the fund in 1 year period divided by the average NAV in the same period. A fund with high Portfolio Turnover Ratio indicates frequent securities trading by fund manager resulting in high trading costs. Therefore, it is necessary to compare with the performance of the fund in order to assess the worthiness of such securities trading.

Sharpe Ratio : A ratio between the excess return of a fund and the risk of investment. The Sharpe ratio reveals the average investment return, minus the risk-free rate of return, divided by the standard deviation of returns for the fund. The Sharpe ratio reflects the extra return that should be received by the fund to compensate the amount of risk taken in investment. The fund with a higher Sharpe ratio is considered superior to other funds in terms of management efficiency since it provides higher excess return under the same risk level.

Alpha : The excess return of a fund relative to the return of a benchmark index. A fund with high alpha indicates that it is able to beat the performance of its corresponding benchmark which is a result of the capabilities of the fund manager in selecting appropriate securities for investment or making investment in a timely manner.

Beta : A measure of the degree and direction of volatility of the rate of return of assets in the investment portfolio of the fund compared to the changes in the overall market. A beta of less than 1.0 implies that the rate of return of the fund's assets is less volatile than that of the securities in the broader market whereas a beta of greater than 1.0 implies that the rate of return of the fund's assets is more volatile than that of the broader market.

Tracking Error : The efficiency of the fund to imitate its return to benchmark. Low Tracking Error means the fund is effective in generating return close to benchmark. High Tracking Error means the fund generates return more deviate from benchmark.

Yield to Maturity : The rate of return earned on a bond held to maturity, calculated from the interest expected to receive in the future over that bond duration and paid back principal discounted to the present value. It is used to measure return of fixed income funds by calculating the weighted average of Yield to Maturity of each bond that the fund invests. As Yield to Maturity has standard unit in percentage per annum, it can be used to compare the returns between fixed income funds that have an investment policy of holding bonds until maturity and similar investment characteristics.

ROBECO

Factsheet | Figures as of 31-08-2025

Robeco Global Stars Equities IL USD

Robeco Global Stars Equities is an actively managed sub-fund that invests in stocks in developed countries across the world. The selection of these stocks is based on fundamental analysis.The Sub-fund's objective is to achieve a better return than the index. The Sub-fund has a concentrated portfolio of stocks with the highest potential growth which are selected on the basis of high free cash flow, an attractive return on invested capital and a constructive sustainability profile. The Sub-fund aims at selecting stocks with relatively low environmental footprints compared to stocks with high environmental footprints.

Performance

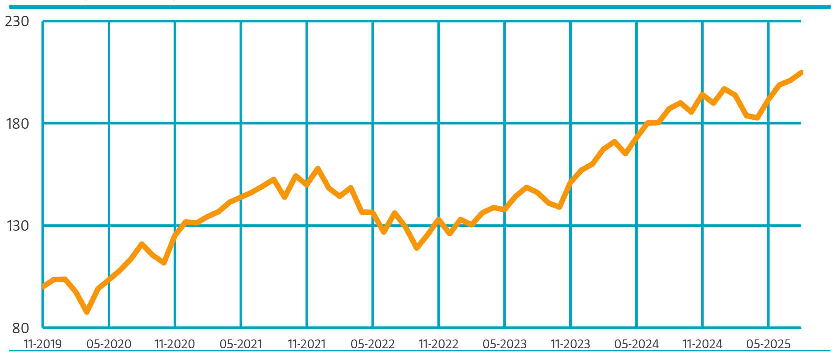
Indexed value (until 31-08-2025) - Source: Robeco



Performance

Based on transaction prices, the fund's return was 1.90%.
In August, the portfolio had a flattish absolute return, slightly lagging the benchmark. Sector-wise, our positioning in consumer discretionary and consumer staples helped performance best. The sectors industrials and financials, however, struggled most. In terms of stock selection, Alphabet contributed most to performance. It is increasingly confident that AI can act as a tailwind rather than a threat for its Search business, visible in overall query growth and user growth in its AI Overviews and Gemini app. Meanwhile, other areas such as YouTube and Google Cloud (GCP) continue to grow strongly as well. Consequently, capex spend will move even higher in the coming years, but all reinvested at high returns as well. Sony Group hit an all-time high as it successfully pushes through portfolio transformation and margin improvements, resulting in an narrowing of the conglomerate discount. Its strong market position in gaming, anime and music leads to an overall better growth and return profile.

Market development

As many prepared for a tough summer, global equity markets still marched on, though more in slow motion mode in August (+0.3% in EUR; +2.6% in USD). The "sell America" trade seems long gone by now as strong earnings momentum continued to drive the AI gravy train, with dovish Fed expectations further running the show in the US. Markets in Europe were mixed, though, with the periphery outperforming core Europe and particularly France, where political instability is back on the radar. There was also some fatigue on German stimulus though. In general, sector leadership was balanced between cyclicals and defensives with laggards and short-cycle stocks making a comeback on rate cut hopes, but also improving fundamentals in pummeled sectors such as healthcare. Given the summer rally so far, policy noise still being present and September traditionally a tougher month, there is no need to go all-in. Unfortunately, our cautious stance has not been able to match the summer melt-up, hurt by the rotation into rate-sensitive laggards and lower quality echelons of the market.

Expectation of fund manager

A bubble reality check gives us reasons for some discomfort. Ballooning US debt as a result of the OBBB, cuts in government R&D hurting productivity, tariffs being inflationary by default, constant attacks on the independence of the Federal Reserve, questioning the reliability of economic data such as labor statistics, the US government taking direct stakes in companies (e.g., Intel), are all examples that keeps us on edge. By any measure, however, equity markets remain in party mode with credit spreads also being very tight. These are hardly the circumstances requiring easing monetary policy, yet the Fed might be prepared to start cutting rates, a scenario investors seem all-in on. Increased short-termism remains the market operating fabric, with any concerns brushed away quickly. Thus, the pain trade from here could be if the Fed decided not to cut at all, or at least less so than many hope for, effectively taking away the punch bowl as the party starts heating up. There's only a bit of Shakespeare needed to create drama, which is something we cannot rule out. A lively autumn lies ahead, but perhaps playing a different tune this time.

Top 10 largest positions

Alpha is generated from active weights, hence we share the holdings whereby we deviate most from the benchmark below. Our top active position is Alphabet, as we believe that with its leading positions in Search, Cloud and the investments into its AI platform, Alphabet has a long runway for growth with attractive returns. To us, Alphabet looks undervalued and is currently not treated as an AI winner, which we think is unjustified. AstraZeneca is our second-largest position and is a UK pharma company that enjoys one of the strongest product pipelines in pharmaceuticals, while at the same time having low risk to patent expirations. Its leading franchises in therapeutic areas such as oncology, cardiovascular diseases and immunology enables it to have strong growth potential for the coming years. JPMorgan Chase completes our top three active positions, a high quality global bank with a strong capital base and loan loss reserve levels, and which has good leverage for a pickup in capital market revenues.

Asset Allocation

Asset allocation	
Equity	97.7%
Cash	2.3%

Sector allocation

The portfolio is overweight in sectors that have a high return on invested capital, a good FCF yield and a good sustainability profile. We are currently overweight in financials, information technology, consumer discretionary and healthcare. We are underweight in consumer staples, industrials, materials and utilities. High inflation continues to impact the market. We are also concerned about slowing growth in the global economy and the rising risk of a global recession, which will impact the cyclical sectors most negatively.

Sector allocation		Deviation index
Information Technology	28.8%	2.5%
Financials	15.8%	-1.4%
Consumer Discretionary	12.1%	1.8%
Communication Services	11.6%	3.0%
Health Care	11.6%	2.3%

Consumer Staples	2.8%	-2.9%
Materials	2.5%	-0.8%
Real Estate	1.8%	-0.2%
Utilities	0.0%	-2.6%

Regional allocation

We have relatively neutral regional weights. We have moved slightly lower in weight in Europe, as we see political turmoil in France and the UK, leading to potential higher credit rates. We have added to our US weight but remain underweight North America. We have a neutral position in Asia-Pacific, with a slight underweight of Japan and an overweight position in Emerging Asia.

Regional allocation		Deviation index
America	73.9%	-1.5%
Europe	16.7%	0.6%
Asia	7.8%	-0.4%
Middle East	1.6%	1.3%

Currency allocation

The fund pursues a moderately active currency allocation policy. We hedge most currencies back to a benchmark position.

Currency allocation		Deviation index

ESG Important information

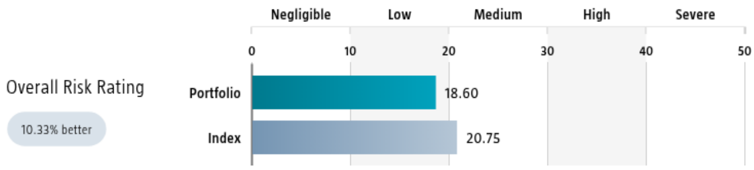
The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

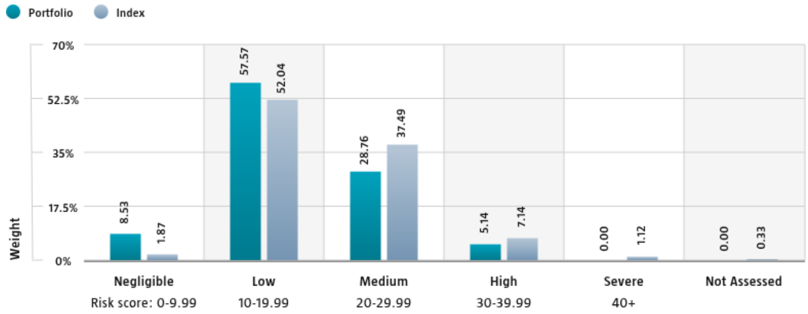
Sustainability

The fund incorporates sustainability in the investment process via exclusions, ESG integration, ESG and environmental footprint targets, and voting. The fund does not invest in issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up fundamental investment analysis to assess existing and potential ESG risks and opportunities. In the stock selection the fund limits exposure to elevated sustainability risks. The fund also targets a better ESG score and at least 20% lower carbon footprint compared to the reference index. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.
For more information please visit the sustainability-related disclosures.
The index used for all sustainability visuals is based on MSCI World Index (Net Return, USD).

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.
Only holdings mapped as corporates are included in the figures.





Source: Copyright ©2025 Sustainalytics. All rights reserved.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

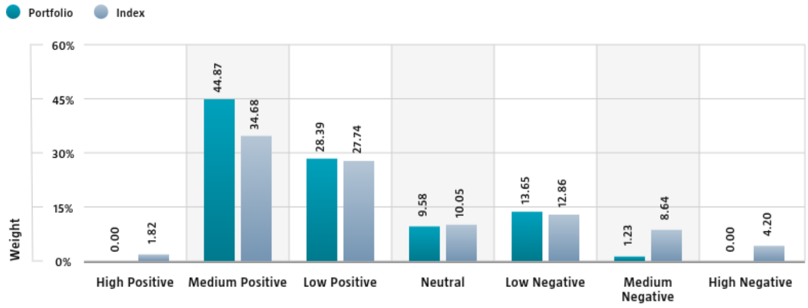
SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.



Source: Robeco. Data derived from internal processes.

Engagement

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	61.07%	32	139
Environmental	9.04%	5	15
Social	7.50%	5	14
Governance	12.02%	4	19
Sustainable Development Goals	37.44%	20	88
Voting Related	4.79%	3	3
Enhanced	0.00%	0	0

Source: Robeco. Data derived from internal processes.

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Investment policy

Robeco Global Stars Equities is an actively managed sub-fund that invests in stocks in developed countries across the world. The selection of these stocks is based on fundamental analysis.The Sub-fund's objective is to achieve a better return than the index. The Sub-fund has a concentrated portfolio of stocks with the highest potential growth which are selected on the basis of high free cash flow, an attractive return on invested capital and a constructive sustainability profile. The Sub-fund aims at selecting stocks with relatively low environmental footprints compared to stocks with high environmental footprints.
The fund aims for a better sustainability profile compared to the Benchmark by promoting certain E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation and integrating ESG and sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, proxy voting and aims for an improved environmental footprint.

Fund manager's CV

Michiel Plakman is Portfolio Manager and Co-Head of Robeco's Global Equity team. He is Lead Portfolio Manager Global Stars Equities and Portfolio Manager Global Engagement Equities. He is responsible for fundamental global equities with a focus on companies in information technology, real estate, communication services and portfolio construction. Before starting this role since 2009, Michiel was responsible for managing the Robeco IT Equities fund within the TMT team. Prior to joining Robeco in 1999, he worked as a Portfolio Manager Japan at Achmea Global Investors (PVF Pensioenen). From 1995 to 1996 he was Portfolio Manager European Equities at KPN Pension Fund. Michiel holds a Master's in Econometrics from Vrije Universiteit Amsterdam and is a CFA® Charterholder. Chris Berkouwer is Portfolio Manager and member of the Global Equity team. He has a focus on the low-carbon transition and on companies in the energy, materials and industrials sectors. He is also Deputy Lead Portfolio Manager Global Stars Equities. He is responsible for fundamental global equities, as well as portfolio construction. Prior to joining Robeco in 2010, he worked as an analyst for The Hague Centre for Strategic Studies. He conducted country, industry and company research for various equity teams before joining the Global Equity team. Chris holds a Master's in Business Administration and International Public Management from the Erasmus University Rotterdam and is a CFA® Charterholder. Yanxin Liu is Portfolio Manager and member of the Global Equity team. She is also Deputy Lead Portfolio Manager Global Stars Equities. She has a focus on information technology. She is responsible for fundamental global equities as well as portfolio construction. Yanxin spent 11 years with our Emerging Markets Equity team, prior to joining the Global Equity team in 2022. Within the Emerging Markets team her focus was on all sectors in Greater China. Prior to that, Yanxin worked for DSM Pension Services in the Netherlands as an analyst focusing on US large-cap equities. Yanxin has a Master's in Finance from the Erasmus University Rotterdam and a Bachelor's in Financial Accounting from Nankai University in Tianjin, China. She became a CFA® Charterholder in 2015 and is a native Mandarin speaker.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.01% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

Investors who are not subject to (exempt from) Dutch corporate-income tax (e.g. pension funds) are not taxed on the achieved result. Investors who are subject to Dutch corporate-income tax can be taxed for the result achieved on their investment in the fund. Dutch bodies that are subject to corporate-income tax are obligated to declare interest and dividend income, as well as capital gains in their tax return. Investors residing outside the Netherlands are subject to their respective national tax regime applying to foreign investment funds. We advise individual investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.
