Remark:

The fund has made the following amendments to its project:

- The master fund's name has been changed to Robeco Credit Income I USD (Master Fund).
- The fund type under other special characteristics is now classified as an ESG Fund (non-SRI Fund).

These changes reflect updates to the master fund's information and are in accordance with the SEC Notification No. KorLorTor-NorPor (Wor) 6/2566. The amendments will be effective from May 15, 2025 onwards.

Additionally, the fund name has been changed from United Sustainable Credit Income Fund to United Smart Credit Income Fund, effective from June 23, 2025 onwards.

Definition

Maximum Drawdown : The percentage of the fund's maximum loss in the past 5 years (or since the fund's inception if it is launched for less than 5 years) which is measured from the highest NAV per unit to the lowest NAV per unit during such period. Maximum Drawdown is an indicator of the risk of loss from investing in the fund.

Recovering Period : The length of time that the fund takes in recovering from the point of maximum loss to earning back the initial investment.

FX Hedging : The percentage of foreign currency investment with FX hedging.

Portfolio Turnover Ratio : The frequency of securities trading in the fund portfolio over a certain period, calculated by taking the lower value between the sum of the value of securities purchased and the sum of the value of securities sold of the fund in 1 year period divided by the average NAV in the same period. A fund with high Portfolio Turnover Ratio indicates frequent securities trading by fund manager resulting in high trading costs. Therefore, it is necessary to compare with the performance of the fund in order to assess the worthiness of such securities trading.

Sharpe Ratio : A ratio between the excess return of a fund and the risk of investment. The Sharpe ratio reveals the average investment return, minus the risk-free rate of return, divided by the standard deviation of returns for the fund. The Sharpe ratio reflects the extra return that should be received by the fund to compensate the amount of risk taken in investment. The fund with a higher Sharpe ratio is considered superior to other funds in terms of management efficiency since it provides higher excess return under the same risk level.

Alpha : The excess return of a fund relative to the return of a benchmark index. A fund with high alpha indicates that it is able to beat the performance of its corresponding benchmark which is a result of the capabilities of the fund manager in selecting appropriate securities for investment or making investment in a timely manner.

Beta : A measure of the degree and direction of volatility of the rate of return of assets in the investment portfolio of the fund compared to the changes in the overall market. A beta of less than 1.0 implies that the rate of return of the fund's assets is less volatile than that of the securities in the broader market whereas a beta of greater than 1.0 implies that the rate of return of the fund's assets is more volatile than that of the broader market.

Tracking Error : The efficiency of the fund to imitate its return to benchmark. Low Tracking Error means the fund is effective in generating return close to benchmark. High Tracking Error means the fund generates return more deviate from benchmark.

Yield to Maturity : The rate of return earned on a bond held to maturity, calculated from the interest expected to receive in the future over that bond duration and paid back principal discounted to the present value. It is used to measure return of fixed income funds by calculating the weighted average of Yield to Maturity of each bond that the fund invests. As Yield to Maturity has standard unit in percentage per annum, it can be used to compare the returns between fixed income funds that have an investment policy of holding bonds until maturity and similar investment characteristics.

ROBECO

Factsheet | Figures as of 31-08-2025

Robeco Credit Income I USD

Robeco Credit Income is an actively managed sub-fund that invests in companies that contribute to realizing the UN Sustainable Development Goals (SDGs). The selection of these bonds is based on fundamental analysis. The Sub-fund will invest in a broad array of fixed income sectors and utilize income efficient implementation strategies. The Sub-fund takes into account the contribution of a company to the UN SDGs. The portfolio is built on the basis of the eligible investment universe and the relevant SDGs using an internally developed framework about which more information can be obtained via the website www.robeco.com/si. The Sub-fund's objective is to maximize current income.

Performance

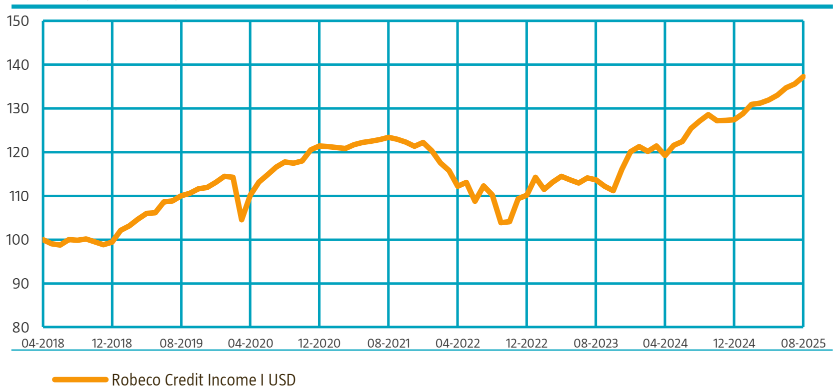
Indexed value (until 31-08-2025) - Source: Robeco



Performance

Based on transaction prices, the fund's return was 1.25%.
The fund had a positive total return in August, with cash yields continuing to make a positive contribution while the duration exposure also made a positive contribution. The total contribution from credit was slightly positive. The strongest positive contributors were Mexico, Coventry Building Society and ZF Friedrichshafen, while the top negative contributors were Owens Illinois, NextEra and Crown Cork.

Market development

Although in the middle of the summer holidays, August turned out to be an eventful month for markets. In the beginning of the month, additional tariff announcements led to some market volatility while weaker macro data also led to slightly weaker credit markets. High yield spreads closed at 308 bps, which is 1 bps wider then last month, and investment grade spreads rose 4 bps to 83 bps. Emerging market spreads were 3 bps wider and closed at 247 bps. On the macro front, the biggest news was the large downward revision of May and June jobs growth. Fed president Powell's comments during the Jackson Hole conference where also seen as relatively dovish by market participants. This led to growing expectations of rate cuts by the Fed and short and intermediate US Treasury yields declined over the month. Five-year US Treasury yields declined 27 bp to 3.70%. There are mounting concerns in the market about the independence of the Fed. Longer-dated treasury did not join the market rally, which was mainly driven by these concerns. In Europe, France's fiscal situation is back in the spotlight, but did not lead to underperformance of French companies so far.

Expectation of fund manager

The announced tariffs and the uncertainty are already leading to lower confidence on both the consumer and producer side of the economy. Labor market numbers in August showed that the economy is slowing down. In corporate earnings, there is already some evidence of the negative impact of trade tariffs. A slowing economy and weaker results in certain sectors could lead to spread volatility in the coming quarters. Markets are still counting on central banks to step in to support the economy. Recent labor market weakness will probably lead to the Fed lowering rates in September, but the market is already pricing for this. After the continued tightening in July, markets are at historical tights. Overall risk positioning should be modest and target carry and roll down. Although markets look tight, there are still attractive individual credit opportunities. We remain cautious on taking too much duration risk, as markets already price for many rate cuts in the US.

Top 10 largest positions

The top ten positions mostly consist of high yield-rated corporates and holdings in subordinated financials. Our subordinated financials positions are mainly in Tier-2 securities. Our high yield holdings are to a large extent in subordinated financials.

Yield to Worst (%, Hedged)	5.9
Green Bonds (%, Weighted)	14.6

Sector allocation

In August, exposure to the automotive sector was reduced. This was not so much driven by a change in top-down views, but more by valuation as spreads for ZF Friedrichshafen and IHO tightened significantly in the first half of the month. Overall, we remain cautious on cyclical sectors and have low allocations to sectors such as chemicals and consumer cyclical. For the banking and insurance sector fundamentals continue to look favorable, but we trimmed exposure as valuations have tightened a lot and further upside is limited. We mainly added in the short-dated covered bonds, where valuations are still attractive compared to the broader market.

Sector allocation	
Financials	39.4%
Industrials	26.8%
Utilities	7.2%
Covered	6.2%
Treasuries	5.3%
Agencies	4.9%
CLO	4.3%
Sovereign	2.0%
ABS	0.5%
Supranational	0.5%
Cash and other instruments	2.9%

Currency denomination allocation

The currency exposure is hedged back to the fund's base currency.

Currency denomination allocation	
Euro	57.5%
U.S. Dollar	32.3%
Pound Sterling	7.4%
Canadian Dollar	0.0%
Australian Dollar	0.0%
Japanese Yen	0.0%
Swiss Franc	0.0%

Duration allocation

US Treasury yields declined after the weak labor market data early August, especially short and intermediate maturities. With markets pricing in several Fed cuts, exposure in the short and intermediate parts of the US curve has substantial negative carry. Part of the US duration exposure was shifted to EUR duration exposure in August. The total duration of the portfolio was slightly increased to 3.6 years.

Duration allocation	
U.S. Dollar	2.6
Euro	1.0
Pound Sterling	0.0
Other	0.0

Rating allocation

The majority of the fund is invested in the BBB-BB space. Given tight valuations, we prefer to take high yield exposure mainly in BB and are cautious on lower-rated bonds.

Rating allocation	
AAA	14.5%
AA	3.7%
A	3.3%
BAA	32.4%
BA	38.7%
B	3.6%
CAA	
CA	0.6%
C	
D	
NR	0.3%
Cash and other instruments	2.9%

Subordination allocation

The fund holds a significant allocation to banking and insurance, mainly via subordinated bonds. In CoCo bonds, we prefer shorter dated calls with high reset spreads. With index spreads close to historical tights, selection should focus on instruments with limited extension risk. During August, exposure to some tight-trading bank and insurance Tier-2 bonds was reduced. In the industrial sectors, euro-denominated hybrids have become relatively expensive and some exposure was reduced over the month.

Subordination type allocation	
Senior	59.3%
Tier 2	14.3%
Tier 1	12.2%
Hybrid	11.2%
Subordinated	0.2%
Cash and other instruments	2.9%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

Sustainability is incorporated in the investment process by the means of a target universe, exclusions, ESG integration, and a minimum allocation to ESG-labeled bonds. The fund solely invests in credits issued by companies with a positive or neutral impact on the SDGs. The impact of issuers on the SDGs is determined by applying Robeco's internally developed three-step SDG Framework. The outcome is a quantified contribution expressed as an SDG score, considering both the contribution to the SDGs (positive, neutral or negative) and the extent of this contribution (high, medium or low). In addition, the fund does not invest in credit issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. ESG factors are integrated in the bottom-up security analysis to assess the impact of financially material ESG risk on the issuer's fundamental credit quality. Furthermore, the fund invests at least 5% in green, social, sustainable, and/or sustainability-linked bonds. Lastly, where a credit issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to exclusion.
For more information please visit the sustainability-related disclosures.
The index used for all sustainability visuals is based on 1/3 Bbg Global Agg Corp Index + 1/3 Bbg US Corp HY + Pan Euro HY ex Financials 2.5% Issuer Cap + 1/3 JPM Corp EMBI Broad Diversified Index.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.
Use of the United Nations Sustainable Development Goals (SDG) logos, including the colour wheel, and icons shall only serve explanatory and illustrative purposes and may not be interpreted as an endorsement by the United Nations of this entity, or the product(s) or service(s) mentioned in this document. The opinions or interpretations shown in this document hence do not reflect the opinion or interpretations of the United Nations.

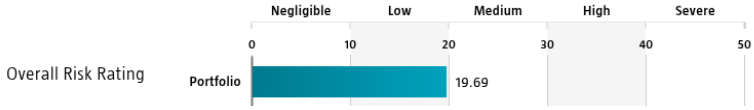
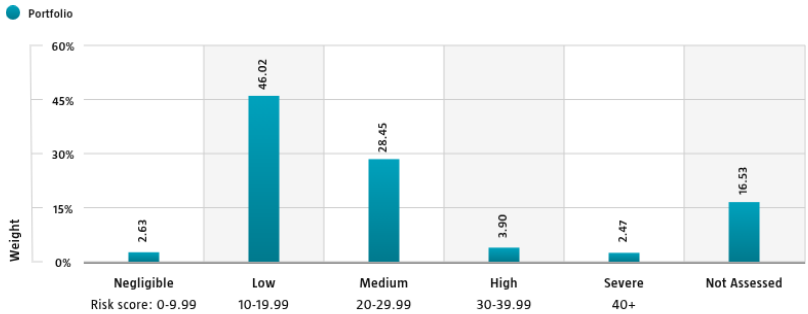
Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.
Only holdings mapped as corporates are included in the figures.





Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

ESG Labeled Bonds

The ESG-labeled bond chart displays the portfolio's exposure to ESG-labeled bonds. Specifically, green bonds, social bonds, sustainability bonds, and sustainability-linked bonds. This is calculated as a sum of weights for those bonds in the portfolio that have one of above mentioned labels. Index exposure figures are provided alongside the portfolio exposure figures, highlighting the difference with the index.

	Portfolio weight
Green Bonds	14.59%
Social Bonds	1.62%
Sustainability Bonds	2.11%

Engagement

Robeco distinguishes between three types of engagement.
Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching internationals standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	1.20%	10	39
Environmental	1.20%	8	34
Social	0.00%	1	4
Governance	0.00%	0	0
Sustainable Development Goals	0.00%	0	0
Voting Related	0.00%	1	1
Enhanced	0.00%	0	0

Investment policy
Robeco Credit Income is an actively managed sub-fund that invests in companies that contribute to realizing the UN Sustainable Development Goals (SDGs). The selection of these bonds is based on fundamental analysis. The Sub-fund will invest in a broad array of fixed income sectors and utilize income efficient implementation strategies. The Sub-fund takes into account the contribution of a company to the UN SDGs. The portfolio is built on the basis of the eligible investment universe and the relevant SDGs using an internally developed framework about which more information can be obtained via the website www.robeco.com/si. The Sub-fund's objective is to maximize current income.
The fund has sustainable investment as its objective within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation. The fund advances the UN Sustainable Development Goals (SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs. The fund integrates ESG (Environmental, Social and Governance) factors in the investment process, applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to normative, activity-based and region-based exclusions.

Fund manager's CV
Evert Giesen is Portfolio Manager Investment Grade in the Credit team. Previously, he was an Analyst, responsible for covering the Automotive sector within the Credit team. Prior to joining Robeco in 2001, Evert worked at AEGON Asset Management for four years as a Fixed Income Portfolio Manager. He has been active in the industry since 1997 and holds a Master's in Econometrics from Tilburg University. Jan Willem Knoll is Portfolio Manager Investment Grade in the Credit team. He joined the Credit team in 2016. Previously, Jan Willem headed the Financials Equity sell-side research team at ABN AMRO. He started his career in the industry in 1999 at APG, where he held several positions including Portfolio Manager of a global insurance portfolio and subsequently a pan-European financials portfolio. Jan Willem holds a Master's in Business Economics from the University of Groningen and he is a CFA® charterholder.

Fiscal product treatment
The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.01% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

If the currency in which the past performance is displayed differs from the currency of the country in which you reside, then you should be aware that due to exchange rate fluctuations the performance shown may increase or decrease if converted into your local currency. The value of the investments may fluctuate. Past performance is no guarantee of future results. The performance data do not take account of the commissions and costs incurred on the issue and redemption of units. Unless otherwise stated, performances are i) net of fees based on transaction prices and ii) with dividends reinvested. Please refer to the prospectus of the funds for further details. The prospectus can be obtained free of charge from the representative and are available. The ongoing charges mentioned in this publication is the one stated in the fund's latest annual report at closing date of the last calendar year. The material and information in this document are provided "as is" and without warranties of any kind, either expressed or implied. ACOLIN Fund Services AG and its related, affiliated and subsidiary companies disclaim all warranties, expressed or implied, including, but not limited to, implied warranties of merchantability and fitness for a particular purpose. All information contained in this document is distributed with the understanding that the authors, publishers and distributors are not rendering legal, accounting or other professional advice or opinions on specific facts or matters and accordingly assume no liability whatsoever in connection with its use. In no event shall ACOLIN Fund Services AG and its related, affiliated and subsidiary companies be liable for any direct, indirect, special, incidental or consequential damages arising out of the use of any opinion or information expressly or implicitly contained in this document. Robeco Institutional Asset Management B.V. (Robeco) has a license as manager of Undertakings for Collective Investment in Transferable Securities (UCITS) and Alternative Investment Funds (AIFs) ("Fund(s)") from The Netherlands Authority for the Financial Markets in Amsterdam. Robeco is subject to limited regulation in the UK by the Financial Conduct Authority. Details about the extent of our regulation by the Financial Conduct Authority are available from us on request.
