Definition

Maximum Drawdown : The percentage of the fund's maximum loss in the past 5 years (or since the fund's inception if it is launched for less than 5 years) which is measured from the highest NAV per unit to the lowest NAV per unit during such period. Maximum Drawdown is an indicator of the risk of loss from investing in the fund.

Recovering Period : The length of time that the fund takes in recovering from the point of maximum loss to earning back the initial investment.

FX Hedging : The percentage of foreign currency investment with FX hedging.

Portfolio Turnover Ratio : The frequency of securities trading in the fund portfolio over a certain period, calculated by taking the lower value between the sum of the value of securities purchased and the sum of the value of securities sold of the fund in 1 year period divided by the average NAV in the same period. A fund with high Portfolio Turnover Ratio indicates frequent securities trading by fund manager resulting in high trading costs. Therefore, it is necessary to compare with the performance of the fund in order to assess the worthiness of such securities trading.

Sharpe Ratio : A ratio between the excess return of a fund and the risk of investment. The Sharpe ratio reveals the average investment return, minus the risk-free rate of return, divided by the standard deviation of returns for the fund. The Sharpe ratio reflects the extra return that should be received by the fund to compensate the amount of risk taken in investment. The fund with a higher Sharpe ratio is considered superior to other funds in terms of management efficiency since it provides higher excess return under the same risk level.

Alpha : The excess return of a fund relative to the return of a benchmark index. A fund with high alpha indicates that it is able to beat the performance of its corresponding benchmark which is a result of the capabilities of the fund manager in selecting appropriate securities for investment or making investment in a timely manner.

Beta : A measure of the degree and direction of volatility of the rate of return of assets in the investment portfolio of the fund compared to the changes in the overall market. A beta of less than 1.0 implies that the rate of return of the fund's assets is less volatile than that of the securities in the broader market whereas a beta of greater than 1.0 implies that the rate of return of the fund's assets is more volatile than that of the broader market.

Tracking Error : The efficiency of the fund to imitate its return to benchmark. Low Tracking Error means the fund is effective in generating return close to benchmark. High Tracking Error means the fund generates return more deviate from benchmark.

Yield to Maturity : The rate of return earned on a bond held to maturity, calculated from the interest expected to receive in the future over that bond duration and paid back principal discounted to the present value. It is used to measure return of fixed income funds by calculating the weighted average of Yield to Maturity of each bond that the fund invests. As Yield to Maturity has standard unit in percentage per annum, it can be used to compare the returns between fixed income funds that have an investment policy of holding bonds until maturity and similar investment characteristics.

SPDR® Gold Shares

GLD®

Fact Sheet

Gold

As of 09/30/2025

Objective

The investment objective of SPDR® Gold Trust (the "Trust") is for the shares to reflect the performance of the price of gold bullion, less the Trust's expenses.

The Price of Gold

The spot price for gold bullion is determined by market forces in the 24-hour global over-the-counter (OTC) market for gold. The OTC market accounts for most global gold trading, and prices quoted reflect the information available to the market at any given time. The price, holdings, and net asset value of the Gold Shares, as well as market data for the overall gold bullion market, can be tracked daily at spdrgoldshares.com.

Past performance is not a reliable indicator of future performance. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted. Visit www.statestreet.com/im for most recent month-end performance. Performance is shown net of fees. Performance of an index is not illustrative of any particular investment. It is not possible to invest directly in an index. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income as applicable.
The market price used to calculate the Market Value return is the midpoint between the highest bid and the lowest offer on the exchange on which the shares of the Fund are listed for trading, as of the time that the Fund's NAV is calculated. If you trade your shares at another time, your return may differ. Effective March 20, 2015, the SPDR Gold Trust (GLD) adopted the LBMA Gold Price PM as the reference benchmark price of gold in calculating the Net Asset Value (NAV) of the Trust. Prior to that date, the Trust used the London PM Fix as the reference benchmark price in calculating the NAV.
‡The gross expense ratio is the Trust's annual operating expense ratio. It is gross of any fee waivers or expense reimbursements. It can be found in the fund's most recent prospectus.

Management

Sponsor	World Gold Trust Services, LLC
Gold Custodians*	HSBC Bank plc and JPMorgan Chase Bank, N.A.
Trustee	The Bank of New York Mellon
Marketing Agent	State Street Global Advisors Funds Distributors, LLC

*As of 12/6/2022, JPMorgan Chase Bank, N.A. was added as a custodian.

Advantages	
Easily Accessible	Listed on the NYSE Arca.
Secure	The Gold Shares represent fractional, undivided interests in GLD, the sole assets of which are physical gold bullion and, from time to time, cash.
Transparent	There exists a 24-hour global over-the-counter market for gold bullion, which provides readily available market data. The price, holdings and net asset value of the Gold Shares, as well as market data for the overall gold bullion market, can be tracked daily at spdrgoldshares.com.
Cost Effective	For many investors, the transaction costs related to the Shares are expected to be lower than the costs associated with the purchase, storage and insurance of physical gold.
Liquid	Structure allows for baskets to be created and redeemed according to market demand, creating liquidity.
Flexible	Gold Shares are listed on the NYSE Arca (Ticker: GLD) and trade the same way ordinary stocks do. It is possible to buy or sell Gold Shares continuously throughout the trading day on the exchange at prices established by the market. Additionally, it is possible to place market, limit and stop-loss orders for Gold Shares.

Important risk information
Investing involves risk, and you could lose money on an investment in SPDR® Gold Trust ("GLD℠" or "GLD").
ETFs trade like stocks, are subject to investment risk, fluctuate in market value and may trade at prices above or below the ETFs' net asset value. Brokerage commissions and ETF expenses will reduce returns.
Commodities and commodity-index linked securities may be affected by changes in overall market movements, changes in interest rates, and other factors such as weather, disease, embargoes, or political and regulatory developments, as well as trading activity of speculators and arbitrageurs in the underlying commodities.
Frequent trading of ETFs could significantly increase commissions and other costs such that they may offset any savings from low fees or costs.
Diversification does not ensure a profit or guarantee against loss.
There can be no assurance that a liquid market will be maintained for ETF shares.
Investing in commodities entails significant risk and is not appropriate for all investors.
Important Information Relating to GLD: GLD has filed a registration statement (including a prospectus) with the Securities and Exchange Commission ("SEC") for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents GLD has filed with the SEC for more complete information about GLD and this offering. Please see the GLD prospectus for a detailed discussion of the risks of investing in GLD shares. When distributed electronically, the GLD prospectus is available by clicking here. You may get these documents for free by visiting EDGAR on the SEC website at sec.gov or by visiting spdrgoldshares.com. Alternatively, GLD or any authorized participant will arrange to send you the prospectus if you request it by calling 866.320.4053.
GLD is not an investment company registered under the Investment Company Act of 1940 (the "1940 Act") and is not subject to regulation under the Commodity Exchange Act of 1936 (the "CEA"). As a result, shareholders of GLD do not have the protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA.
GLD shares trade like stocks, are subject to investment risk and will fluctuate in market value. The value of GLD shares relates directly to the value of the gold held by GLD (less its expenses), and fluctuations in the price of gold could materially and adversely affect an investment in the shares. The price received upon the sale of the shares, which trade at market price, may be more or less than the value of the gold represented by them. GLD does not generate any income, and as GLD regularly sells gold to pay for its ongoing expenses, the amount of gold represented by each Share will decline over time to that extent.

The information provided does not constitute investment advice and it should not be relied on as such. It should not be considered a solicitation to buy or an offer to sell a security. It does not take into account any investor's particular investment objectives, strategies, tax status or investment horizon. You should consult your tax and financial advisor.
All information is from SSGA unless otherwise noted and has been obtained from sources believed to be reliable, but its accuracy is not guaranteed. There is no representation or warranty as to the current accuracy, reliability or completeness of, nor liability for, decisions based on such information and it should not be relied on as such.
