Overview of the Thai Stock Market May 9, 2025 to October 31, 2025

May 2025 to October 2025: In May the index continued to decline from capital outflows following MSCI's reduction of Thai stock weightings, the Fed maintaining interest rates at 4.25 - 4.50% and warning of stagflation conditions, profit-taking after the announcement of 1Q25 operating results, and low IPO volume for the ThaiESGX funds that launched this month. Despite some positive developments early in the month after the US and UK reached a trade agreement as the first countries to do so, while China continued to roll out economic stimulus measures, and 1Q25 operating results that came out well. In June the index faced continuous selling pressure from the 12-day retaliatory attacks between Israel and Iran, raising concerns about the closure of the Strait of Hormuz, which would impact approximately 20% of global oil supply. Domestic pressures included political issues with the Bhumjaithai Party announcing its withdrawal from the government coalition, conflicts between Thailand and Cambodia, and significant forced selling across multiple stocks. In July The index rose notably, driven by positive expectations on various issues such as: trade negotiations with the US nearing successful conclusion, easing tensions in US-China trade policy, upward revisions to global and Thai GDP forecasts, expectations that the BOT will cut the policy interest rate, and continuous fund flows coming into the market. In August the index rose in the first half of the month but closed negative. Supporting factors were beat expectation 2Q25 earnings results, the MPC cut interest rate and fund inflow into THAI. However, the index faced selling after earnings reporting season ended as sell o fact, while US planned to pose additional tariff to countries that import energy from Russia. In September, the index continued to rise after PM Paethongtan was out from office and then Bhumjaithai Party became lead government party, which caused briefly political vacuum period. New government also propose short-term stimulus ready-to-implement measures, especially "Half-half". The Fed cut interest rate as expected. In October, the index moved volatilely due to external factors such as concerns about excess oil supply from OPEC+, China's Golden Week economy, and the slowing U.S. labor market. However, some recovery began to be seen from the Fed Chair signaling an end to QT and the meeting between Chinese and U.S. leaders.

Summary of the Thai stock market between May 2025 and October 2025: The SET index rose by 9.4%.
