

Eligible for PVD transfers

United CIO Income Fund TH RMF (UIFTRMF)

Fund Type / AIMC Category

- Mixed Fund
- Feeder Fund / Retirement Mutual Fund (RMF) / Fund with Foreign Investment related Risks
- Foreign Investment Allocation

Investment Policy and Strategy

- The Fund will mainly invest in United CIO Income Fund – Class T USD Acc (Master Fund)
- The master fund is managed by UOB Asset Management Ltd (Singapore)
- The master fund diversifies its investments globally and may invest indirectly through mutual funds, exchange-traded funds (ETFs), real estate investment trusts (REITs), equities, equity-related securities, bonds, or debt instruments issued directly by such companies.
- The fund may consider investing in derivatives for the purpose of instruments risk hedging, the use of such instruments is subject to the discretion of the fund manager. Such instruments may include swaps and/or forward contracts referencing debt securities and/or interest rates. Additionally, the fund may invest in derivatives for foreign exchange (FX) hedging purposes, covering no less than 90% of the value of its foreign investments.
- The fund seeks to closely track the performance of the master fund, which employs an active management strategy.

Bloomberg code : UNIIFTU SP

Definition

Maximum Drawdown : The percentage of the fund's maximum loss in the past 5 years (or since the fund's inception if it is launched for less than 5 years) which is measured from the highest NAV per unit to the lowest NAV per unit during such period. Maximum Drawdown is an indicator of the risk of loss from investing in the fund.

Recovering Period : The length of time that the fund takes in recovering from the point of maximum loss to earning back the initial investment.

FX Hedging : The percentage of foreign currency investment with FX hedging.

Portfolio Turnover Ratio : The frequency of securities trading in the fund portfolio over a certain period, calculated by taking the lower value between the sum of the value of securities purchased and the sum of the value of securities sold of the fund in 1 year period divided by the average NAV in the same period. A fund with high Portfolio Turnover Ratio indicates frequent securities trading by fund manager resulting in high trading costs. Therefore, it is necessary to compare with the performance of the fund in order to assess the worthiness of such securities trading.

Sharpe Ratio : A ratio between the excess return of a fund and the risk of investment. The Sharpe ratio reveals the average investment return, minus the risk-free rate of return, divided by the standard deviation of returns for the fund. The Sharpe ratio reflects the extra return that should be received by the fund to compensate the amount of risk taken in investment. The fund with a higher Sharpe ratio is considered superior to other funds in terms of management efficiency since it provides higher excess return under the same risk level.

Alpha : The excess return of a fund relative to the return of a benchmark index. A fund with high alpha indicates that it is able to beat the performance of its corresponding benchmark which is a result of the capabilities of the fund manager in selecting appropriate securities for investment or making investment in a timely manner.

Beta : A measure of the degree and direction of volatility of the rate of return of assets in the investment portfolio of the fund compared to the changes in the overall market. A beta of less than 1.0 implies that the rate of return of the fund's assets is less volatile than that of the securities in the broader market whereas a beta of greater than 1.0 implies that the rate of return of the fund's assets is more volatile than that of the broader market.

Tracking Error : The efficiency of the fund to imitate its return to benchmark. Low Tracking Error means the fund is effective in generating return close to benchmark. High Tracking Error means the fund generates return more deviate from benchmark.

Yield to Maturity : The rate of return earned on a bond held to maturity, calculated from the interest expected to receive in the future over that bond duration and paid back principal discounted to the present value. It is used to measure return of fixed income funds by calculating the weighted average of Yield to Maturity of each bond that the fund invests. As Yield to Maturity has standard unit in percentage per annum, it can be used to compare the returns between fixed income funds that have an investment policy of holding bonds until maturity and similar investment characteristics.

Important Notice & Disclaimers

Investors should consider carefully whether to subscribe for units in the base currency of the Fund or for units in various classes which are denominated in their respective currencies. The difference in the performances of the Fund in various currencies, if applicable, is a reflection of fluctuating exchange rates during the relevant period.

A prospectus for the fund(s) (the "Fund(s)") may be obtained from the Manager or any of its appointed distributors. Investors should read the prospectus before deciding whether to subscribe for or purchase units in the Fund(s) ("Units"). All applications for Units must be made on application forms accompanying the prospectus or otherwise as described in the prospectus. **Past performance of the Fund(s) or the Manager and any prediction, projection or forecast on the economy or markets are not necessarily indicative of the future or likely performance of the Fund(s) or the Manager.** Any extraordinary performance may be due to exceptional circumstances which may not be sustainable. The value of Units and any income from the Fund(s) may fall as well as rise, and is likely to have high volatility due to the investment policies and/or portfolio management techniques employed by the Fund(s). The above information is strictly for general information only and must not be construed as an offer or solicitation to deal in Units, nor a recommendation to invest in any company mentioned herein. Investments in unit trusts are not obligations of, deposits in, or guaranteed or insured by UOB, UOBAM, or any affiliates or distributors. The Fund may use or invest in financial derivative instruments and you should be aware of the risks associated with investments in financial derivative instruments which are described in the Fund's prospectus. An investment in unit trusts is subject to investment risks and foreign exchange risks, including the possible loss of the principal amount invested. Investors may wish to seek advice from a financial adviser before making a commitment to invest in Units. In the event an investor chooses not to seek advice from a financial adviser, the investor should consider carefully whether the Fund(s) is/are suitable for him.
