UOB Asset Management (Thailand) Co., Ltd.

Date as of 30 January 2026

United US Technology Equity Fund (UUSTECH)

UUSTECH

Fund Type / AIMC Category

- Equity Fund
- Feeder Fund / Sector Fund : Technology / Fund with Foreign Investment related Risks / Cross Investing Fund
- Technology Equity

Investment Policy and Strategy

- The Fund will mainly invest in JPMorgan Funds – US Technology Fund Class JPM US Technology I (acc) - USD (Master Fund) on average during the fiscal year, not less than 80% of the fund's NAV. The master fund aims to achieve long-term capital growth by primarily investing in equity securities of U.S. companies involved in technology-related sectors (including, but not limited to, technology, media, and communication services)
- The master fund is managed by JPMorgan Asset Management (Europe) S.à r.l
- The fund may consider investing in derivatives for the purpose of investment risk hedging. The use of such instruments is subject to the discretion of the manager.
- The fund may invest in other mutual funds which are managed by this management company in a ratio not exceeding 20% of NAV.
- The fund seeks to closely track the performance of the master fund, which employs an active management strategy.

Definition

Maximum Drawdown : The percentage of the fund's maximum loss in the past 5 years (or since the fund's inception if it is launched for less than 5 years) which is measured from the highest NAV per unit to the lowest NAV per unit during such period. Maximum Drawdown is an indicator of the risk of loss from investing in the fund.

Recovering Period : The length of time that the fund takes in recovering from the point of maximum loss to earning back the initial investment.

FX Hedging : The percentage of foreign currency investment with FX hedging.

Portfolio Turnover Ratio : The frequency of securities trading in the fund portfolio over a certain period, calculated by taking the lower value between the sum of the value of securities purchased and the sum of the value of securities sold of the fund in 1 year period divided by the average NAV in the same period. A fund with high Portfolio Turnover Ratio indicates frequent securities trading by fund manager resulting in high trading costs. Therefore, it is necessary to compare with the performance of the fund in order to assess the worthiness of such securities trading.

Sharpe Ratio : A ratio between the excess return of a fund and the risk of investment. The Sharpe ratio reveals the average investment return, minus the risk-free rate of return, divided by the standard deviation of returns for the fund. The Sharpe ratio reflects the extra return that should be received by the fund to compensate the amount of risk taken in investment. The fund with a higher Sharpe ratio is considered superior to other funds in terms of management efficiency since it provides higher excess return under the same risk level.

Alpha : The excess return of a fund relative to the return of a benchmark index. A fund with high alpha indicates that it is able to beat the performance of its corresponding benchmark which is a result of the capabilities of the fund manager in selecting appropriate securities for investment or making investment in a timely manner.

Beta : A measure of the degree and direction of volatility of the rate of return of assets in the investment portfolio of the fund compared to the changes in the overall market. A beta of less than 1.0 implies that the rate of return of the fund's assets is less volatile than that of the securities in the broader market whereas a beta of greater than 1.0 implies that the rate of return of the fund's assets is more volatile than that of the broader market.

Tracking Error : The efficiency of the fund to imitate its return to benchmark. Low Tracking Error means the fund is effective in generating return close to benchmark. High Tracking Error means the fund generates return more deviate from benchmark.

Yield to Maturity : The rate of return earned on a bond held to maturity, calculated from the interest expected to receive in the future over that bond duration and paid back principal discounted to the present value. It is used to measure return of fixed income funds by calculating the weighted average of Yield to Maturity of each bond that the fund invests. As Yield to Maturity has standard unit in percentage per annum, it can be used to compare the returns between fixed income funds that have an investment policy of holding bonds until maturity and similar investment characteristics.

Vietnam Equity(UCITS) Fund

Factsheet – November 2025

Investment Team

Mai Vu
Portfolio Manager

Investment Objective

VEF provides investors with broad exposure to Vietnam's public equity markets and seeks medium to long-term capital appreciation through investing in companies in key sectors contributing to Vietnam's economic growth. The Investment Manager will invest in securities which are, in its opinion, undervalued or fairly valued but have good growth potential. VEF integrates ESG and sustainable practices into its investment approach and is classified as Article 8 under the EU Sustainable Finance Disclosure Regulation (SFDR).
